

## BOYCOTT HONEYWELL CAMPAIGN

**Honeywell**

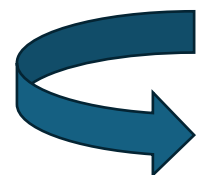

Honeywell International is a diversified U.S. multinational corporation with 132,000 employees around the globe. Its Canadian branch, Honeywell Canada, employs approximately 3,600 – 4,500 Canadian workers mostly situated in the province of Ontario. Honeywell Canada's headquarters is located in Mississauga, Ontario, at 3333 Unity Drive. Within the Canadian context Honeywell focuses on three main areas: (i) aerospace, (ii) thermostats and building controls and (iii) performance materials and technology.

Regrettably, Honeywell International is one of many North American companies (e.g., BAE Systems, Boeing, Lockheed Martin, Colt Manufacturing Company, Northrop Grumman, General Dynamics and L3 Harris Technologies) profiting from Israel's genocide in the Gaza Strip and devastating attacks on the West Bank, Syria, Lebanon and more recently joint U.S./Israeli strikes on Iran. Israel's weapon of choice is the F-35 fighter jet made by Lockheed Martin (U.S.) alongside more than 110 Canadian companies including Canada's Honeywell Aerospace division.

Canada's Honeywell Aerospace division is the sole provider of the F-35 Power & Thermal Management System (PTMS), which is responsible for combining the Auxiliary Power Unit, Emergency Power Unit, Environmental Control System, and Thermal Management System into a single unit. The PTMS has been dubbed "the heart and circulatory system of the F-35." Based on supply chain activity, Canada and Canadian-based companies like Honeywell Aerospace are complicit in the Gaza genocide and attacks on the West Bank, Syria, Lebanon and joint U.S./Israeli strikes on Iran. To date, well over 75,000 Palestinians have been slaughtered among many more victims. We must do everything in our power to stop this barbarism.

*Photo of the Power & Thermal Management System (PTMS) made by Honeywell Aerospace in Mississauga, Ontario.*

We are running a boycott campaign to pressure Canada's Honeywell Aerospace division to break their corporate complicity with Israel's genocide and its attacks on the West Bank, Syria, Lebanon and combined U.S./Israeli strikes on Iran. Alongside the UN Commission's 2025 report, which found Israel has committed genocide in the Gaza Strip, the International Criminal Court (ICC) issued arrest warrants for top Israeli officials, Mr. Benjamin Netanyahu and Mr. Yoav Gallant. Canada's Honeywell Aerospace division is profiting from genocide and war. *It must stop.* Honeywell Canada has a choice to make: (i) *stop corporate complicity with genocide and war or (ii) risk losing business from ethical companies and consumers.*

If you're a company or consumer that purchases Honeywell products we are requesting that you copy the boycott letter below (or write your own) to Honeywell Canada and send it as a political measure to end Honeywell Canada's complicity in genocide and war.

Remember to include in the letter: your printed name, signature, date, city, postal code and email address.

If you get a response from Honeywell Canada please consider emailing a copy to our grassroots organization at [staltnatives@gmail.com](mailto:staltnatives@gmail.com) so that we can gauge the response.

In solidarity with all those struggling for a world without war and genocide.
