Dear Sir,

Since Celestica is subcontracted to oversee Honeywell Aerospace in Mississauga, Ontario, you are facing an important issue related to Honeywell Aerospace's complicity in the Gaza Strip and attacks on the West Bank, Syria, Lebanon and other regions, including Israeli strikes on Iran. Israel's preferred weapon is the F-35 fighter jet made by Lockheed Martin (U.S.) alongside more than of 110 Canadian companies including Canada's Honeywell Aerospace division.

Canada's Honeywell Aerospace division is the sole provider of the F-35 Power & Thermal Management System (PTMS), which is responsible for combining the Auxiliary Power Unit, Emergency Power Unit, Environmental Control System, and Thermal Management System into a single unit. The PTMS has been dubbed "the heart and circulatory system of the F-35." Based on supply chain activity, Canada and Canadian-based companies such as Honeywell Aerospace are complicit with Israel's genocide and growing regional attacks on neighbouring countries. To date, well over 75,000 Palestinians have been slaughtered among many others with the very F-35s that Honeywell Aerospace is helping to manufacture. *This is complicity with a genocidal regime.*

Alongside the UN Commission's 2025 report, which found Israel has committed genocide in the Gaza Strip, the International Criminal Court (ICC) issued arrest warrants for top Israeli officials, Mr. Benjamin Netanyahu and Mr. Yoav Gallant. According to international law, complicity in genocide is a crime. I urgently request that you take all measures necessary to end Honeywell Aerospace's complicity in war and genocide without delay.

In the meantime, I have no choice but to boycott Honeywell products and inspire other companies and consumers to do the same. I look forward to hearing about your plan to stop Honeywell Aerospace's complicity in war and genocide.

Sincerely,
