THE TRUE FACE OF CANSEC

Just Peace Advocates reports, "U of T partnerships with Israeli universities [...]. At least 17 of the 44 external investment managers used by the U of T Asset Management Corporation (UTAM) have direct connections to at least 55 companies operating in the military-affiliated defence, arms, and aerospace sectors. Many of these companies supply materials to the Israel Defence Forces. It is highly likely that U of T is profiting off of activities that bolster Israeli activities in the occupied Palestinian territory."
